

Auto Configure iSurf@NIE wireless SSID on User's Notebook (for Windows Vista, 7 and 8)

iSurf@NIE auto configuration package.

Pre-requisites

- Internet connectivity ready on your own external wireless service provider (eg SingTel, StarHub or M1 etc) or use your own home network to download the configuration zip file (auto add ssid.zip file). Click [here](#) to download.

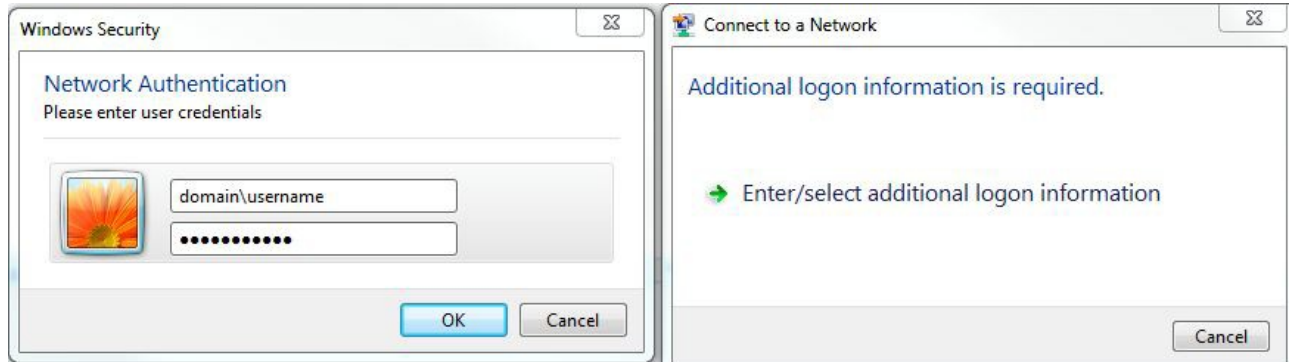

1) Download and unzip the file name "**auto add ssid.zip**" onto your local C drive and thereafter check and verify the folder "auto add ssid wireless" is created.

2) Inside this "**auto add ssid**" folder, double click this file "**add iSurf@NIE.bat**" to run the batch file. This process will auto configure iSurf@NIE wireless SSID into your system.

3) When done, the **iSurf@NIE** SSID is created.

4) Input your campus account **username, password** and domain (**niestudent** or **niestaff**) when prompted.

Note:

1. Please restart your system if credentials had entered but still failed to connect.

Re-enter your credentials again after power-up.

2. You may wish to manually configure iSurf@NIE if all else failed.
